GE23627 DESIGN THINKING AND INNOVATION

AY 2026-2027

S.C.O.P.E.S – Team Scope Sheet

Scoping of design challenge When you want to work on real project using Design Thinking, begin the process with a specific and purposeful situation or problem to solve called Design Challenge. The Design Challenge should be doable, clear, actionable and hopefully inspiring. Your problem statement should be an outcome and not a solution.
You can use SCOPES as a tool to brainstorm and frame your problem.

TEAM NAME	**Sync Up**
TEAM MEMBERS	**Mahalakshmi D(241701028)** **Shallini B(241701051)**
DOMAIN NAME	**Education**
DATE	
FACULTY INCHARGE	**Dr. R. Revathy**

S – Situation / Problem • What is the real situation you want to address?	Students find it difficult to discover college events and connect with interested teammates because information is scattered across multiple platforms.

• Where does this problem occur? • Describe without mentioning any solution.	The problem occurs in colleges and universities where event information is shared through WhatsApp, social media, websites, notice boards, and club channels. The problem occurs in colleges and universities where event information is shared through WhatsApp, social media, websites, notice boards, and club channels.
C – Constraints What are the CONSTRAINTS when trying to address the situation or problem?	• Event information is scattered across multiple platforms. • Not all colleges have a common event management system. • Ensuring only verified colleges and clubs can post events. • Protecting student data and privacy. • Keeping event details accurate and up to date. • Encouraging active participation and regular app usage. • Integrating with different college websites and registration systems. • Supporting a large number of users during major events.

O – Objectives & Outcomes What are the OBJECTIVES and intended OUTCOME of this design challenge?	• Create a centralized platform for all college events. • Help students discover events based on their interests. • Enable students to form or join teams for competitions. • Improve communication between students, clubs, and colleges. • Increase student participation in academic and extracurricular activities. OUTCOMES- A user-friendly platform that simplifies event discovery, team formation, and registration, leading to higher participation, better collaboration, stronger networking, and an improved overall campus experience.
P – People Who are the PEOPLE that you are trying to help? Whose problem are you trying to address? Primary Stakeholders Secondary Stakeholders Decision Makers	**Primary Stakeholders** • College Students • Student Clubs and Event Organizers **Secondary Stakeholders** • Faculty Coordinators • College Administration • Placement & Training Cell • Alumni and Industry Mentors **Decision Makers** • Principal • Head of Departments (HODs) • College Management • Student Affairs/Dean of Student Welfare • IT Administrator/System Administrator

E – Estimates What are the ESTIMATED resources required for this design challenge?	**Team:** 2 members (UI/UX, Frontend, Backend, Database, AI/Testing) **Software:** Flutter, Firebase, FastAPI/Python, PostgreSQL, Figma, GitHub **Hardware:** Laptops, smartphones for testing, internet connection **Time:** 2-3 months for design, development, testing, and deployment **Data:** College event details, club information, student feedback, and user testing participants
S – Scope to Explore Is there ample SCOPE to explore multiple alternatives to address the problem?	• Different methods for event discovery and recommendations. • Various team formation and matching techniques. • Multiple communication options (chat, forums, notifications). • Integration with college websites, clubs, and social media. • AI-based personalization and event suggestions. • Future expansion to internships, workshops, and nationwide college events.
Frame the Design Challenge	• **How might we create a centralized platform that helps students easily discover, explore, and register for all college events in one place?**

	• **How might we help students find suitable teammates based on their skills, interests, and event requirements?** • **How might we improve communication between students, event organizers, and college clubs through timely notifications, updates, and event information?**

SIGNATURE
